Data Usage Agreement for DR-QI

The purpose of this agreement is to set out the terms for using the Demographic-Rich Qualitative UPV-Interviews Dataset presented in the LREC 2022 paper: 'At the Intersection of NLP and Sustainable Development: Exploring the Impact of Demographic-Aware Text Representations in Modeling Value on a Corpus of Interviews'.

DR-QI collects qualitative interviews from rural communities in India and Uganda, which are sentence annotated by experts for their User-Perceived Values (UPV): a schema that classifies values expressed by speakers.

By signing this agreement I, _____, confirm that:

- I will only use the DR-QI dataset for academic purposes. I will not use the database for any commercial purposes.

- I will not share the DR-QI dataset or any portion of the dataset with any third party without the explicit consent of the authors of the data

- All documents and papers that report on research that uses the DR-QI dataset will acknowledge this by citing the following paper:

  "At the Intersection of NLP and Sustainable Development: Exploring the Impact of Demographic-Aware Text Representations in Modeling Value on a Corpus of Interviews", G. van Boven, S. Hirmer, and C. Conforti. LREC, 2022.
